Dear Glyn

Improvements to the current water supply situation in South Ceredigion are a matter for Dwr Cymru, the Environment Agency and Ceredigion County Council. After consultation with the Environment Agency, Dwr Cymru has confirmed that it is progressing a scheme that will bring a new water supply from the Claerwen Reservoir in Powys to the company's Strata Florida Water Treatment Works in South Ceredigion. Considerable preparatory work will need to be undertaken by the company before any physical works can be commenced.

Yours

Andrew
